

Characteristics

Setaparfum has been created specifically for designs that require a superior resistance to chemical agents. Many of the world's most famous luxury brands use Setaparfum for their high-end cosmetic displays.

Setaparfum is the defined range of cast acrylic sheets "cross-linked" for applications that require an improved resistance to chemical attack.

The tests conducted in our laboratory show that subjected to the aggression of chemical agents Setaparfum is 40 times more resistant acrylic extruded and 5 to 6 times more resistant acrylic cast sheet "standard."

Custom colors are available upon request through our expert color matching service.
